Tritan®
International
patent

Perfect form and exceptional brilliance: the patented Tritan® crystal glass collections combine functional design with natural materials, long-lasting brilliance and excellent dishwasher resistance.

Discrete effervescent points which are laser etched at the inside base of the bowl to improve the presentation and longevity of the bubble stream. These points help to encourage the gas to separate at the base of the bowl, which in turn causes the bubbles to spiral upwards through the full length of the champagne / sparkling wine in the glass.
